

## CALIFORNIA BIRD LIST

This is the official checklist of birds recorded in California, as maintained by the Western Field Ornithologists' California Bird Records Committee (CBRC). As of 1 February 2020, 675 species are on the Main List, and five more are on the Supplemental List. At least one record of a species must be endorsed by the CBRC to be included on the list. Subheaders (e.g., "Grebes") indicate families. Taxonomy and nomenclature follow the 60th supplement to the American Ornithological Society's *Check-list of North American Birds*.

Documentation of the occurrence of CBRC review species should be submitted to the CBRC Secretary at [secretary@californiabirds.org](mailto:secretary@californiabirds.org). Documentation (except for the physical specimens) supporting all records reviewed by the CBRC is permanently archived at the Western Foundation of Vertebrate Zoology, 439 Calle San Pablo, Camarillo, California 93012-8506, where it is available to researchers.

## LEGEND

- \* CBRC Review Species (198 species)
- I* Introduced but now established in California (13 species)
- E* Extirpated from California (1 species)
- RI* Reintroduction in progress - not yet established (1 species)

For species not supported by curated specimens (124 species):

- P* At least one record with identifiable photograph (123 species)
- V* At least one record with identifiable video (26 species)
- A* At least one record with identifiable audio recording (13 species)
- S* Supported only by sight records (1 species)
